Re: OU-4, Approval of Transfer Line for Transport of Solar Pond and Interceptor
Trench System (ITS) Waters to Building 374

Dear Mr Schassburger,

The Colorado Department of Health, Hazardous Materials and Waste Management
Division (the Division) is hereby responding to a faxed letter, as received on
February 18, 1993, from James K Hartman The letter sought approval to use an
existing pipeline, as described in Attachment 1 of the letter, to transport solar
pond and ITS water to Building 374 for evaporation

The Division concurs with DOE's request to use the transfer line to expedite the
treatment of pond and ITS water in fulfillment of goals set forth in the approved
IM/IRA Decision Document, dated April 1992 DOE may commence transfer immediately
provided the daily inspections set forth in the subject letter are initiated
concurrently

The Division will make arrangements with DOE to conduct an inspection of the
transfer line within two weeks of the receipt of this approval. Based upon the
inspection, the Division may instruct that other measures be taken to ensure that
the transfer line remains protective of human health and the environment

If you have any questions please contact Harlen Ainscough of the Division at 692-
3337

Sincerely,

Gary W Baughman
